

A low-angle, black and white photograph of several tall skyscrapers reaching towards the sky. The perspective creates a sense of height and scale, with the buildings' lines converging towards the top of the frame. A blue rectangular box is overlaid on the right side of the image, containing the company's name and tagline.

Enterprise Solutions

Your One Stop for Technology Outsourcing

Integrated Service Offerings

Industry Verticals				
Retail	Distribution & Logistics	Media & Publishing	Healthcare	Manufacturing
Service Lines	Application Development			
	Enterprise Collaboration			
	Business Intelligence			
	Enterprise Integration			
	Enterprise Mobility			
	ERP Implementation			
	Independent Testing Services			
	IT Infrastructure and Application Support			

Application Development

E2T (Engage – Evaluate – Transition) is our approach towards partnering with our customers. We clearly define SLAs & deliverables and offer an initial evaluation period over which the customer gains confidence on all our performance aspects. Once the partnership evolves in to a steady state engagement, we keep your IT application needs on track with:

Transform - includes Bespoke Application Development, Application Reengineering, Application Migration and Application Rationalization/consolidation

Optimize – includes Performance Tuning, Code Refactoring, Usability Engineering, Mobile Enablement and SDLC process improvement

Support – includes Application Feature Enhancements and maintenance, Application Support and Service Desk

Enterprise Collaboration

We believe collaboration is all about connecting people, improving content and optimizing workflow processes – in addition to making it easier to find the right people and right content or process when you need it. We bring strong capabilities in building collaborative solutions for more than 15 years for our customers.

We help organizations enable quick access to data as well as smooth collaboration among employees, vendors and customers by building:

- ➔ Custom portals (Internet & Intranet)
- ➔ Content management solutions
- ➔ Advanced workflow solutions
- ➔ Dashboards & BI analytics

Enterprise Integration

Diverse IT architecture across an organization results in information silos and department isolation. Our Enterprise Integration practice has proven experience that helps organizations to build highly agile enterprise integration solution.

Our integration technology expertise:

- Middleware products
- Applications and tools
- B2B/B2C Integration
- Data Integration
- Enterprise SOA

We also have implementation partnership with IBM, Oracle, iWay Software and Microsoft.

ERP Implementation

We follow a rigorous and time tested Oracle's Application Implementation Methodology for all ERP implementation projects. Our ERP practice makes sure we deliver the expected benefits on time while maintaining the allocated budget and keeping the older systems running till the new system is up and running.

Our ERP suite include:

- Oracle Apps (e-Business Suite & Fusion)
- Oracle Retail & Commerce
- Microsoft Axapta

Our domain experts and functional consultants can understand the challenges of your organization and provide consulting on various modules as well as provide exclusive support on need basis.

IT Infrastructure and Application Support

In today's volatile business world, enterprises face significant challenges in scaling and managing their global IT infrastructure. We understand the dynamic infrastructure requirements of enterprises today and provide effective and reliable support services for:

- Servers
- Network
- Database
- Application
- End User Devices
- Security
- Storage
- Cloud
- Datacenter

Business Intelligence/Data Warehousing

We help enterprises to harness the underlying organizational data to derive deeper insights and discover hidden trends for improved decision making, and thereby progress towards business excellence.

Our focus areas include:

- Data Management (ETL - Extract, Transform and Load functions),
- Business Intelligence (OLAP – Online Analytical Processing; reports and adhoc queries; mobile BI; Analytics etc.)
- Data warehousing

Enterprise Mobility

Enterprises are struggling to build enterprise-grade mobile apps quickly and cost-effectively and to distribute them securely. Yet with proliferating devices and platforms, fragmented data sources and a growing tangle of APIs, developing cross-platform app becomes ever challenging.. MBaaS (Mobile Backend-as-a-Service) can help overcome these challenges by taking care of backend tasks like integration with legacy systems, user authentication, API auto gen, scaling and so on. With our services we can help you to leverage the real benefits of MBaaS.

Our other services in this space include:

- Consulting
- App development
- Mobile Device Management (MDM) and Mobile testing.

Independent Testing Services

With the advent and emergence of Social platforms, Mobile, Analytics and Cloud (SMAC), the fundamental concept of testing itself has shifted towards empowering user experience with lesser cost of quality. We help organizations to set up a complete end-to-end QA team with matured and innovative processes, skilled resources and time tested methodologies. Our Testing CoE has transformed many enterprises and ensured high-level stability, performance, quick availability with industry's emerging testing methodologies like:

- Behavior driven testing
- Test driven development
- QA automation services

Why ASPIRE ?
